-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The drawing is objected to in that the legends in figure 2 is in German. Also, it is designated as "Diagramm 1" as well. Correction is required.

2. The specification is objected to under 35 USC 112, 1st paragraph in that in page 9, last paragraph, it states that "Diagram 1 shows". However, the "Diagram 1" has been designated as "Fig. 2". Correction is required.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,739,383 to Marchionni et al. and further in view of either US 2002/0036073 (see, [0059]) to Takeuchi et al. Or US 7,156,152 to Hohenbichler (see col. 3, line 20+ and col. 6, line 28+).

Marchionni et al. substantially show the invention as claimed except that they do not specifically state to provide an inert atmosphere containing nitrogen and hydrogen above the molten metal pool. However, in the junction paragraph between col. 5 and 6, they does discloses that the inert gas containing nitrogen, hydrogen, ammonia or carbon dioxide, of mixture thereof are provided to surround the meniscus of the molten metal pool. Also, each of the secondary references shows to provide an inert atmosphere containing nitrogen and hydrogen above the molten metal pool to prevent molten metal from oxidizing. In view of the prior art teaching as a whole, it would have been obvious to provide the inert gas atmosphere of the secondary references above the molten metal pool of Marchionni et al. to prevent the molten metal from oxidizing. With respect to claims 5 and 6, both secondary references also show to provide mixture of nitrogen, hydrogen and argon as an inert atmosphere.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jonathan J. Johnson can be reached on 571-272-1177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
